

Dutch
CardioVascular
Alliance

**Joseph C. Wu,
MD, PhD**

**Stem Cells and
Genomics for
Precision Medicine**

Joseph C. Wu MD, PhD is professor of cardiovascular Medicine and Radiology at Stanford School of Medicine and director of the Stanford Cardiovascular Institute (USA). Prof. Wu's

clinical work focuses on adult congenital heart disease and cardiovascular imaging. His lab works on biological mechanisms of patient-specific induced pluripotent stem cells (iPSCs), focusing on novel mechanisms of differentiation, iPSC derivation techniques and creating iPSC-based cellular assays for drug screening.

**Date: 6th of May 2021
5 pm - 6.30 pm (CET)**

via Zoom

Meeting ID: 915 7230 5247

Passcode: RJPJ01

Organised by:

The DCVA iPSC-CM Journal Club

The Dutch Cardiovascular Alliance (DCVA) formed a journal club on induced pluripotent stem cell-derived cardiomyocytes (iPSC-CMs); aimed at discussing the latest developments, sharing protocols and creating common guidelines to improve the quality (control) of iPSC studies.
