

Addendum II: overview of principal investigators

Applicants should ask one of the HBCx principal investigators (PI) as a mentor of the project. A statement of support should be submitted with your proposal. HBCx PI's can be mentor of one applicant. HBCx PI's select the candidate that they would like to mentor among the candidates that applied for mentorship with them. For external candidates: you can approach one of the PI's by sending an email to info@heart-institute.nl. We will forward your application to the PI. See for an overview of HBCx addendum I.

Work Package & topic	Principal Investigators (PI)
WP1a: cardiac factors of flow variation	
Permanent atrial fibrillation	Cor Allaart
Aortic valve stenosis and replacement	Ronak Delewi
Heart failure / venous congestion	Robert van Oostenbrugge Hans-Peter Brunner la Rocca
RACE-V: Paroxysmal atrial fibrillation	Isabelle van Gelder Uli Schotten
WP1b: vascular factors	
Blood pressure variability	Jaap Kappelle Arfan Ikram
Cerebral blood flow regulation	Thijs van Osch
Endothelial biomarkers	Mat Daemen
WP1c: cerebral factors	
Amyloid	Wiesje van der Flier
WP2: modulating factors	
Sex	Lieza Exalto
Advanced age	Gerard Jan Blauw Thijs van Osch
Environment	Michiel Bots
WP3: next level diagnostics	
Cardiac image analysis	Rob van der Geest
Brain image analysis	Esther Bron
HBC matrix analyses	Geert Jan Biessels
Biomarkers / biobank	Imo Höfer Charlotte Teunissen
WP4: heart-brain clinics	
Heart-Brain clinic	Majon Muller Gerard Jan Blauw
